

SWIM JET SERIES:

With a Swim Jet in the pool the training effect is that of a much larger pool. It creates a counter-current to allow you to swim “on the spot” in the pool, so you can exercise and practice your swimming technique at the same time building up your strength and endurance. They are suitable for all types of swimming pools and are easy to install, preferably on one of the shallow side of the pool. To adjust the flow to suit your swimming speed you just use the flow control placed on the Swim Jet front in the pool wall. This product is made from steel and copper.

***** Note: Only the head unit of the swim jet is sold, does not include Valves, Pipe and Pump.**

Pump size can be from 4 HP – 5 HP.
