

VACUUM HOSE SERIES:

Our trusted quality vacuum hose made of EVA material with high flexibility and resistance to abrasion and can withstand temperature up to 60° Celcius. Our product have a good chemical resistance suitable for swimming pool and spa vacuuming. Its body has interlocking construction creating a strong reinforcement and durability. The cuff that connects to vacuum port in swimming pool or skimmer box pipe is the standard 1.5 inch size. The adaptor that connect to a vacuum head can spin 360° so it gives a great flexibility to control your vacuum head.

Connection to vacuum head is flexible and able to rotate 360 degree.

Double coiled reinforcement and made with strong, durable, but flexible material.

Able to withstand chemical in pool water and temperature up to 60° Celcius.
